Changing Hospital Environment.

Present day hospital environment with sophisticated diagnostic equipments are meant to provide accurate diagnostics of patients for early detection as well for regular treatment.

Healthcare architects, designers & space planner as they are called have introduced innovative design concepts ranging from the expected to the unheard of. They not only consider R&D aspect of these design technology. They study the healing impact of factors such as room size and scale, privacy, lighting, ventilations, the colour of the walls and furnishing, fabrics, art, music and views.

Frank Shields medical equipment changing the hospital environment.

The Clear View Murals can be widely used in MRI, CT, X-RAY, and other treatment places like CCU, ICU etc.

Frank Shields has developed the Clear View Murals using natural photography with high resolution and realistic pictures as suited for the treatment room.
